

Domino's Pizza

“Sometimes companies do what they say, but SignManager does it all the time.”

SignManager first partnered with Domino's Pizza three years ago, to assist with a Remove & Dispose program within the Franchise Division. Through that program their partnership grew, and SignManager then managed the Repair & Maintenance Program for them. This led to an opportunity to manage Domino's Pizza's corporate signage nationally.

SignManager has a reputation for performing above the expectations of their clients. In building this relationship with Domino's Pizza, they identified what sets SignManager apart from similar project management consultancies. “Some companies do what they say, but SignManager does it every time and deliver a quality service and manage with a unique business model. I can give them something and forget about it, because I know it'll get done.”

SignManager prides itself on providing a service that allows the client to give them a project, walk away and know each finite detail will be handled. The transparent system has assisted in making our clients daily job free of headache with respect to branding. If our client is on the road traveling and needs to check details for any location, they can login to Signifi at any time and obtain details from past or present

projects. In a fast and constantly moving technological world, SignManager continues to keep several paces ahead. Asking clients what we can do to make their jobs easier and continuing to evolve to meet their needs, whatever that need might be.

It's a great pleasure working with a signage consultant who has the same sense of urgency we do. SignManager places a strong emphasis on service and budget, while maintaining the consistency of our brand image which is important to us. We can depend on SignManager for resolving our signage related issues providing a continued service of excellence.
